

1 read you an instruction that says intent can be based on
2 the circumstances surrounding evidence.

3 We don't have to see a hand-in-hand transaction
4 to know what the intent was behind having 163 crack
5 rocks in the, in the baggie on the floor and 23 crack
6 rocks in our pocket along with \$5,000.

7 There's been this ploy for sympathy about poor
8 Mr. Walker. He's just a poor drug addict. He's just a
9 poor drug addict. He, he just takes his -- he just
10 takes the drugs. He doesn't sell the drugs.

11 How do you think using reason and common sense
12 he gets the money to buy the drugs that he's taking. He
13 sells the drugs. He's selling the narcotics. He's
14 gonna sell the drugs that are in his pocket. He's gonna
15 sell the drugs that are on floor at his feet.

16 As far as the proper way to weigh the drugs,
17 you heard Tiffany Staples testify. You heard her
18 analysis. She was cross-examined on it.

19 What she told you is that the lab policy
20 requires that they test two drugs of all of the ones
21 that come in on a certain case. She went out of her way
22 to test four drugs the first time. Then she reopened
23 the case to look at even more of the cocaine to see if
24 it was going to make 50, 50 grams or not. That was the
25 threshold.
